ABOUT ME

A B.Tech Computer Science undergraduate with strong interest in software development and real-time systems. Experienced in building and deploying full-stack and ML web applications. Active contributor to developer communities with demonstrated leadership, teamwork and communication skills.

EDUCATION

College of Engineering, Chengannur - Alappuzha, Kerala
Bachelor of Technology (B.Tech), Computer Science || **CGPA: 9.24**
September 2023 - May 2027

G.G.H.S.S. , Haripad
Biology Science Class XII || **Percentage: 99.75%**
June 2019 - May 2021

SKILLS

Programming Languages: C, Python, Java, MASM, HTML, CSS, JavaScript
Libraries/Frameworks: Flask, Scikit-learn, Pandas, NumPy, React, Random Forest, Machine Learning
Tools/Platforms: Git, GitHub, VS Code, Linux (basic), REST APIs, AWS, Gemini API, Prompt Engineering (basic)
Concepts: Data Structures & Algorithms, OOP, MySQL, MongoDB, Data Analysis, Cybersecurity (fundamentals), Model Deployment, Data Preprocessing, API Integration, Unit Testing, Debugging

EXPERIENCE

Google Developer Group On-Campus CEC September 2025 – September 2026
Media Lead Chengannur

- Produced and edited promotional reels and highlight videos for 5+ tech events using CapCut and Canva, reaching a 550+ member developer community across social platforms.
- Designed event promotional content and managed post-production editing, growing GDG On-Campus CEC's Instagram following to 552+ followers within one academic year.

Google Student Ambassador 2026 May 2026 – Present
Campus Ambassador Chengannur

- Hosted 5+ virtual tech events on Google Meet for 13+ student attendees, demonstrating live AI product builds using Gemini and Google AI tools.
- Evaluated and interviewed student candidates for the Google Student Ambassador program, contributing to campus-wide ambassador recruitment.

PROJECTS / OPEN-SOURCE

GreenGrow – Smart Fertilizer Recommendation System | GitHub Python, Machine Learning, Flask, Scikit-learn, Pandas & NumPy

- Engineered and deployed a full-stack ML web application using Flask, Scikit-learn, and Random Forest, achieving 95% prediction accuracy across 11 crop categories from real-time weather API, pH value and NPK soil data.

PulseGuard – Real-Time Monitoring & Alert System | GitHub Flask, React, Docker, AWS SNS

- Developed a real-time heart monitoring system during an 18-hour hackathon using Flask, React, and Docker, integrating AWS SNS to automate emergency alerts on abnormal pulse detection.

CERTIFICATIONS

- Deloitte Australia Job Simulations (Technology, Data Analytics, Cyber Security) – Forage
- AWS Summit Certification – Amazon Web Services
- Tink-Her-Hack 3.0 – TinkerHub CEC Chengannur
- Tink-Her-Hack 2.0 – TinkerHub CEC Chengannur
- ARCANE 2024 – IEEE SB CEC Chengannur
- State Science Seminar, Grade A – State Shastrolsavam
